

PROMPTIFY

RULE BOOK

OVERVIEW

“Promptify” is a team-based technical event designed to test participants’ technical knowledge, prompt engineering, web development, problem-solving, adaptability, and coding efficiency.

The event consists of **3** competitive rounds, progressively increasing in difficulty, ranging from technical assessment and prompt-based website replication to adaptive website development and deployment.

Each team must consist of
2 to 3 participants.

PRIZE OVERVIEW

Your skills, creativity and teamwork can
take you to the top! Here's what you're competing for.

1st Prize

₹5,000

5K UPTO 2K COUPONS

2nd Prize

₹3,000

3K UPTO 1K COUPONS

3rd Prize

₹2,000

2K UPTO 500 RS COUPONS

❀ Coupons or gifts are included in the prize pool. ❀

ROUND 1: TechRush

ROUND 1 — ONLINE ROUND

挑戦

Objective

To provide a fair opportunity for teams to demonstrate their collective understanding, technical knowledge, and problem-solving skills, while also evaluating their effective team coordination, communication, and ability to work together within a limited time.

共に、前へ

BETTER
TOGETHER
FURTHER

Quiz Format

- 30 questions conducted online.
- Questions will have different difficulty levels.

Topics Covered

AI &
AI Models

Data Structures &
Algorithms (DSA)

Web
Development

Git &
Version Control

Computer
Networks

Aptitude &
Logical Reasoning

Scoring & Shortlisting

- Teams will be ranked based on their total score.
- In case of a tie, time taken to complete the quiz will be considered.
- The top **15** teams will qualify for **Round 2**.

創造 X AI X チームワーク

Round 2 :

ReverseX

AI WEBSITE RECREATION

Date
10 OCTOBER

Objective

To test the team's observation, memory, prompt engineering, AI-tool usage, and effective team coordination by challenging them to recreate a reference webpage using AI-based tools within a limited time.

Think
Prompt
Create

Round 2 : ReverseX

KEY DETAILS

1 Pre-Round Lifeline Quiz

- An online quiz will be conducted before the main challenge.
- The top 3 teams will receive an advantage in the form of a Lifeline.

2 Reference Website Viewing

- At the beginning, teams will be shown a reference webpage for **30–40 seconds**.
- Focus on:
 - ✓ Page layout & section placement
 - ✓ Colours, fonts & spacing
 - ✓ Buttons, images & components
 - ✓ Header & footer
 - ✓ Overall appearance

i Once the viewing period ends, the reference webpage will no longer be normally available.

3 Website Recreation

- Teams get **~45 minutes** to recreate the webpage.
- Use AI tools (AI coding tools, builders, etc.).
- Any Google account can be used.
- Early submission is allowed (time will be recorded).

4 Lifeline System

- Each team gets 1 Lifeline in Round 2.
- Allows to view the original webpage again for 30 seconds.
- **Top 3 teams** (from pre-round quiz) can use it without penalty.
- Others can use it once with a 5-minute penalty.
- Cannot be transferred to another team.
- Available only during the 30-second period.

Round 2 :: ReverseX

❀ EVALUATION CRITERIA ❀

Description

Timing

Speed + quality of submission; early or on-time delivery without errors.

Web Structure

Layout, sections, components, and semantic content organization.

Aesthetics

Colors, fonts, spacing, visual similarity to original design; high fidelity.

Header & Footer

Placement, design, and key functional elements (e.g., nav, links, copyright) for global components.

Responsiveness

Layout adaptation across different screen sizes and devices.

Prompt Word Count

Conciseness; effective use of language without unnecessary length; adhering to limits.

Prompt Evaluation

Final prompt will be evaluated using the organizers' Gemini setup.

Submission

Submit your final prompt and recreated website through the provided method.

BUILD • RECREATE • WIN

Round 3

Code Kaizen

Build • Debug • Improve

Date
10 October

Objective

A practical development challenge where teams will debug an existing website, develop new features, and adapt to changing requirements.

This round tests:

Project Understanding

Debugging Skills

Development Ability

Adaptability

Problem-Solving

Team Coordination

1

STARTING PROJECT

Each team will receive a Git repository containing a website with existing issues.

Teams must first:

- Understand the existing project and its functionality.
- Identify how the website currently works.
- Analyse the existing code before making major changes.

2

INITIAL TESTING & DEBUGGING

Teams will have 20 minutes to:

- Understand and test the project.
- Identify and fix existing errors.
- Improve parts of the website that are not working correctly.

Understand

Debug

Improve

After the initial 20-minute debugging phase, four instructions will be provided one after another. Each instruction will require a specific change, feature, improvement, or modification.

Instruction 1	10 Minutes
Instruction 2	15 Minutes
Instruction 3	20 Minutes
Instruction 4	25 Minutes

- Changes made during earlier instructions must continue to work correctly with all later modifications.
- Teams should therefore build each feature carefully without breaking previously implemented functionality.

All online services must be accessed using the Gmail account provided by the organizers.

Personal or unapproved accounts/logins are not permitted.

Violation of this rule will result in disqualification.

No external devices are permitted.

Teams must use only the setup and equipment provided or approved by the organizers.

At the end of the round:

Submit the link to the final website.

Submission must be made within the given time.

The website must contain the final version after all required changes.

Failure to submit within the specified time will result in disqualification.

ROUND 3 – SCORING

Evaluation Area

- 🌸 Web Structure
- 🌸 Aesthetics
- 🌸 Header & Footer
- 🌸 Responsiveness

Web Structure

Correct arrangement of sections and elements according to the expected website.

Aesthetics

Colours, fonts, components, spacing, and overall visual appearance.

Header & Footer

Layout, content, positioning, and overall appearance.

Responsiveness

Proper functioning and layout across different screen sizes.

Evaluation Area

- 🌸 Functionality
- 🌸 Edge Cases
- 🌸 Security
- 🌸 Database

Functionality

Required features, buttons, forms, and actions must work correctly.

Edge Cases

Website should properly handle unusual, empty, or incorrect inputs.

Security

Basic security and safe handling of user input and data.

Database

Correct storage, retrieval, updating, and communication with the website where required.

UI/UX

Following the Instructions

TOTAL

UI/UX

Overall usability, navigation, clarity, and visual consistency.

Following the Instructions

All four development tasks must be implemented correctly and completely.

FINAL WEBSITE CHECK

The final website will be compared with an ideal website prepared by the organizers.

Evaluation may include:

- Website structure & visual design
- Header & Footer
- Responsiveness
- Working features & backend
- Database & security
- Handling of unusual inputs
- Overall UI/UX
- Correct implementation of all four instructions

GENERAL RULES

Team Work

Teams must work only with their own members. Sharing answers, code, prompts, or solutions with other teams is prohibited.

Fair Play

Copying, interfering with another team, or misusing the event setup is not allowed.

Round-Specific Rules

Rules and permitted tools may differ between rounds. Participants must follow the rules applicable to the respective round.

Submission

All required work must be submitted through the specified method and within the given time.

Technical Problems

Technical issues must be reported to organizers immediately. Problems reported after the submission deadline may not be considered.

Organizer Instructions

Participants must follow all instructions given by the organizers throughout the competition.

DISQUALIFICATION

A team may be disqualified for:

- ★ Cheating or using unauthorized help.
- ★ Sharing answers, code, prompts, or solutions with another team.
- ★ Copying another team's work.
- ★ Using prohibited external devices.

- ★ Using a personal or unapproved account during Round 3.
- ★ Tampering with the provided project or evaluation system.
- ★ Failing to submit the required website within the given time.
- ★ Deliberately violating competition rules.

IMPORTANT

Use of any personal or unapproved external login during Round 3 will result in immediate disqualification.
